

Generate QR codes to easily split bill payments between your friends.

### What's the problem?

Nowadays there are multiple traditional money transfer platforms, the problem is that their **rates are high**, the **waiting time** can be very long and they are complex to use. People need a convenient way to get their portions of the total bill instantly and not have to worry about **calculating exactly everyone's amounts**.

### Solution

A space to split the total bill between friends easily and quickly. Using a Solana supported wallet like Phantom.

### Market

**+\$9 Billion**

Solana Market  
(2023)

### The product

Zoren is a **web platform** built on Solana that allows users to streamline money transfers through easily accessible QR codes with Solana Pay. It also allows the creation of "Sessions", which allow a single payment to be divided between several users.

### What stage?

Functional, under the Solana **Devnet** network

Ready for new users from anywhere.
